## The Builders Choice Story:

We've combined a heavy duty commercial internal mechanism with outward styling that reflects modern and contemporary designs.

We've combined the passage door and bathroom door privacy options within the one set so you can choose either application on the fly during installation or even after installation.

We've combined an internal stainless steel ball bearing mechanism within a solid zinc die cast backplate housing.

We've combined ingenuity and style to create a durable handle that is underpinned by an exclusive patented stainless steel ball bearing mechanism, fire rating and 15 year mechanical warranty.

The Builders Choice range  
combines quality, value and style,  
Passage & Privacy, All In One.
